

# CHOOSE THE RIGHT SOLUTION

When you're looking for the perfect headset, there are things you need to consider.

## WHERE ARE YOU WORKING?

### AT OFFICE DESK

You spend most of your time in the office, at the desk and on the phone.

### AROUND THE OFFICE

You spend more time in the office than on the road but you need freedom in the office to perform.

### ON THE GO

You spend more time on the move and you need to be able to work from anywhere.

## WHAT DO YOU WANT TO CONNECT TO?

You'll need to consider your connectivity needs to make sure your headset solution is compatible with your phone system. You can always contact a Jabra reseller if you need more advice.

### TRADITIONAL DESK PHONE

### SOFTPHONE/VOIP

### MOBILE/SMARTPHONE

### TABLET

### MULTIPLE DEVICES

## HOW NOISY IS YOUR WORK ENVIRONMENT?

Whether it's a little chatter in the background or a colleague sitting right beside you, the right speakers help you get the most out of your calls while the right microphone delivers quality audio on the other end - where it really counts.

### LOW NOISE

Omni-directional microphones pick up sound from any direction and block ambient and surrounding noise. Fine for the traditional, low-noise office.

### AVERAGE NOISE

Noise canceling microphones and a mono speaker reduce unwanted background noise while ensuring you're still aware of your surroundings. Great for use in noisier, open office environments.

### HIGH NOISE

Noise/ultra noise canceling microphones combined with duo speakers filter aggressive noise and can block the sound of someone sitting right beside you. Perfect for very noisy, distracting environments.

## WIRELESS OR CORDED?

### WIRELESS HEADSET SOLUTIONS

Great if you want to move away from the desk or just a streamlined, cordless headset design.

### CORDED HEADSET SOLUTIONS

Perfect if you only work at your desk and you want the best possible audio quality in one or both ears.
